

CPU Usage	CPU user time	Used memory	Traffic incoming Interface	Interface Interface description
CPU avg load	CPU sys time	Memory Utilization	Interface Inbound packets discarded	Interface Interface last change
CPU avg load 1min avg	CPU softirq time	Cached memory	Interface Inbound packets with errors	Interface Interface MAC address
CPU avg load 5min avg	CPU nice time	Number of network interfaces	Interface Outbound packets discarded	Interface Interface type
CPU avg load 15min avg	CPU irq time	Interface Discovery	Interface Outbound packets with errors	DuplexStatus
CPU idle time	numCPUs	Interface status change	Interface Speed	Interface Bandwidth
CPU iowait time	Total memory	Traffic outgoing Interface	Interface Operational status	Optical Module Interface : RxPower Low Threshold

ICMP ping	Power Supply status	Firewall Module State	Manufacturer	Used Disks Space
ICMP loss	temperature	Module Trap Status	Appliance model	Total Disks Space
ICMP response time	Location	Device name	SSH Sessions	Count
sensor value	Model	Macaddress	System information	Description
FAN speed	Name	BGP Status	Port monitoring	
Fan Status	Serial	Device contact details	Read/Write Speed	
Power Supply Voltage	hardware Uptime	Product Version	Free disks space
