

# AD DS Health and Performance

Active directory web services events	State of service "LanmanWorkstation" (workstation)	DRA outbound bytes total/sec	DRA pending replication synchronizations	LSASS processor time
LDAP searches/sec	State of service "LanmanServer" (server)	DRA inbound bytes total/sec	I/O log writes average latency	LDAP port is running
Database size	State of service "Kdc" (Kerberos Key Distribution Center)	LDAP writes/sec	I/O log writes/sec	DNS server events
State of service "W32Time" (windows time)	State of service "IsmServ" (Intersite messaging)	DFS replication events	I/O database reads/sec	Directory service events
State of service "SamSs" (Security Accounts Manager)	State of service "Dnscache" (DNS client)	LDAP active threads	I/O database reads average latency	Log file size
State of service "RpcSs" (Remote Procedure Call (RPC))	State of service "DNS" (DNS server)	LDAP client sessions	Kerberos authentications	Windows security
State of service "Netlogon" (Netlogon)	State of service "DFSR" (DFS replication)	DRA inbound object updates remaining in packet	NTLM authentications
